The diagram is split into two vertical panels. The left panel, with a dark blue background, represents a monolithic architecture. It features a single, large, light blue rectangle in the center, which is divided into a top header section and a larger main content section. Above this rectangle is a small, dark blue horizontal bar. The right panel, with a teal background, represents a microservices architecture. It features two smaller, light blue rectangles stacked vertically. Each rectangle is divided into a top header section and a larger main content section. The top rectangle's main content section is further divided into two parts: a left side containing a white line graph icon and a right side containing five horizontal white bars of varying lengths. The bottom rectangle's main content section is similarly divided, with the left side containing a white person icon and the right side containing five horizontal white bars of varying lengths. Above each of these two rectangles is a small, dark blue horizontal bar, identical to the one in the left panel.
